MICHIGAN

Pensionomics 2023:

Measuring the Economic Impact of DB Pension Expenditures

Key Findings

Benefits paid by state and local pension plans support a significant amount of economic activity in the state of Michigan.

Pension benefits received by retirees are spent in the local community. This spending ripples through the economy, as one person's spending becomes another person's income, creating a multiplier effect.

In 2020, expenditures stemming from state and local pensions supported...

76,945 jobs that paid \$4.2 billion in wages and salaries

\$12.4 billion in total economic output

\$1.5 billion in federal, state, and local tax revenues

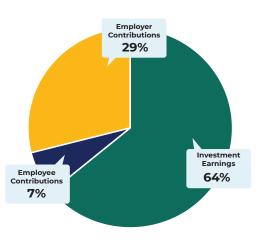

... in the state of Michigan.

Each dollar paid out in pension benefits supported \$1.30 in total economic activity in Michigan.

Each dollar "invested" by Michigan taxpayers in these pension plans supported \$4.50 in total economic activity in the state.

Overview

Expenditures made by retirees of state and local government provide a steady economic stimulus to Michigan communities and the state economy. In 2020, 391,523 residents of Michigan received a total of \$9.6 billion in pension benefits from state and local pension plans.

The average pension benefit received was \$2,039 per month or \$24,473 per year. These modest benefits provide retired teachers, public safety personnel, and others who served the public during their working careers income to meet basic needs in retirement.

Between 1993 and 2020, 29% of Michigan's pension fund receipts came from employer contributions, 7% from employee contributions, and 64% from investment earnings.* Earnings on investments and employee contributions—not taxpayer based contributions—have historically made up the bulk of pension fund receipts.

Impact on Jobs and Incomes

Retiree expenditures stemming from state and local pension plan benefits supported 76,945 jobs in the state. The total income to state residents supported by pension expenditures was \$4.2 billion.

To put these employment impacts in perspective, in 2020 Michigan's unemployment rate was 10.0%. The fact that DB pension expenditures supported 76,945 jobs is significant, as it represents 1.6 percentage points in Michigan's labor force.

Economic Impact

State and local pension funds in Michigan and other states paid a total of \$9.6 billion in benefits to Michigan residents in 2020. Retirees' expenditures from these benefits supported a total of \$12.4 billion in total economic output in the state, and \$7.1 billion in value added in the state.

Impact on Tax Revenues

State and local pension payments made to Michigan residents supported a total of \$1.5 billion in revenue to federal, state, and local governments. Taxes paid by retirees and beneficiaries directly out of pension payments totaled \$95.6 million. Taxes attributable to pension expenditures in the local economy accounted for \$1.4 billion in tax revenue.

Federal Tax	\$599.4 million	
State/Local Tax	\$859 million	
Total	\$1.5 billion	

Economic Multipliers

\$1.00 contributed by taxpayers to Michigan pensions over 30 years **\$**4.50

total output

Each \$1 in taxpayer contributions to Michigan's state and local pension plans supported \$4.50 in total output in the state. This reflects the fact that taxpayer contributions are a minor source of financing for retirement benefits—investment earnings and employee contributions finance the lion's share.

Economic Impacts by Industry Sector

The economic impact of state and local pension benefits was broadly felt across various industry sectors in Michigan. The five industry sectors with the largest employment impacts are presented in the table to the side.

Industry	Employment Impact (# Jobs)
Hospitals	5,500
Limited-service restaurants	4,265
Other real estate	2,706
Full-service restaurants	2,705
Offices of physicians	2,691

Industry totals include the first round of impacts from pension payments to state residents, and do not account for recaptured "leakage" to or from other states.

Economic Impacts by Occupation Category

The pension benefits in Michigan supported jobs in every civilian job category, as shown in the table below.

Occupation Category	Wage and Salary Employment	Wage and Salary Income	Supplements to Wages and Salaries	Employee Compensation
Food Preparation and Serving Related Occupations	7,725	\$157,486,192	\$28,102,696	\$185,588,888
Office and Administrative Support Occupations	7,571	\$355,759,348	\$70,376,132	\$426,135,480
Sales and Related Occupations	7,384	\$296,306,203	\$54,701,459	\$351,007,663
Healthcare Practitioners and Technical Occupations	6,100	\$557,779,983	\$120,356,973	\$678,136,956
Transportation and Material Moving Occupations	5,131	\$217,655,595	\$44,312,462	\$261,968,058

^{*}Caution should be used in interpreting these numbers. See the Technical Appendix of the full Pensionomics report for details.
